

# Save the Children in North West Balkans

*UNICEF Bosnia and Herzegovina*

2024-07-10

Summer school is a great place where children can have fun, meet new friends, but also increase self-confidence and motivate themselves for better results in the next school year.

The little ones from the Una-Sana Canton know this, and they use these sunny and warm days to play, express their creativity, and exchange knowledge.

Even during this summer school vacation, they continue to use the Akelius digital application for learning foreign languages in order to use the English language and thus enrich their vocabulary. With the help of the game "Story in a bag", their imagination encouraged them to come up with and tell each other exciting and fun stories.

See what a class of the Akelius digital platform for learning foreign languages looks like in our summer school.
